About This Game

Cannon Fodder 3 is a tactical action game, which inherited the style and traditions of the original game. The war goes on and its scale is nearly the same as before. 500 conscripts are sent to meet their destiny. What awaits them? A general's stars or a bed of honor?

These 21st century soldiers are equipped much better than their 1994 predecessors. They have 8 types of machinery, suitable for land, surface and airborne operations, as well as 17 types of weapon from assault rifles to the nuclear bomb.

Skirmishes take place all around the world and even in space! You'll fight throughout the day and night, in hot and cold weather, in snow and rain. The enemy is skilled - there're terrorists from all over the world and they have cutting-edge technologies at their disposal: teleportation and various mechanized combat systems. Our heroes will face great challenges - artillery strikes, insuperable force fields, automated turrets, suicide soldiers and giant humanoid robots.

Your savvy will come in handy: your actions aren't limited to slaughter and destruction. You'll have to capture enemy vehicles and bases, save hostages and rescue convicts, hold the line and shoot back from the turrets, search for data discs and spare parts, repair broken robots and bypass minefields. The high command carefully watches your operation's progress: missions can be aborted because of major offence; minor misbehavior will be reprimanded, and great achievements will be rewarded with medals and promotions. In the end, the very best soldiers will receive the greatest reward: they will return to home camp where warm army barracks, hot army food, soft army bunks and a tender drill sergeant await them. Until the next time.

Mission 03
The Obvious Menace!

Your objective is to destroy all enemy buildings. 6 weapon boxes have been dropped to this location - try to find it.

The play control is horrible. The camera is mapped to the mouse and whenever you move the mouse the camera follows, then it moves back to the unit on it's own. This makes me sick with the constant scrolling. Your natural instinct is to use the mouse to select things but you cannot, instead teh camera moves. I had to stop playing because the camera/mouse moving was making me sick. Which is a shame, i loved this game a sa kid, alas this new version is a major letdown.. Well, Its what you Expect from Cannon Fodder ... Its great, amusing game of war. As their motto is War has never been so much fun.

But Beware.... Even as we are in 2014... Still the loading sequence between EACH LEVEL takes between 1-2 mins... Its STUPID LONG AND RIDICULOUS !!! Please do not buy Cannon Fodder 3.

Do not let nostalgia and a low price point con you into exchanging money for this fetid turd of a game. It is an embarrassment and a tragedy that such an awful game should even be released, let alone one intended to revive one of the greatest RTS series of the 90s.

Spend your money more wisely - grab the original Cannon Fodder on GOG.com for \$7, then spend the remaining \$10 on [chocolate milk and cookies](#).. Do not waste your money on this game. I made a terrible mistake. One of my new favorite games! This one plays just like you remember the old Cannon Fodder games, except you get lots of different weapons, and the graphics are more modern.. While technically flawed (low FPS regardless of the system, for me disabling v-sync caused incredibly long load times ... like 5 min to load a level 0 o, whith v-sync on its a few sec) ... this is still an ok stab at bringing the classic CF vibe to the modern day. Get it on sale if you have that soft spot for the Amiga original.. OMG! If this has any of the qualities of the original two games, it's gonna be awesome. I prob should really have played the game before writing this. but im too excited that they released a updated Cannon Fodder!

[All we need now, is releases like Moonstone, IK+, Chaos Engine, Xenon etc... Now that would be fantastic.](#)

[My recomendation, buy this and give it a shot, its not to pricey and i think we'll all be surprised..](#)

fun game for pass time. should try!!!. This is an extremilly bad rendition of the famous originals.

They should be completely ashamed of themselves and all records of this "game" should be destroyed and all those responsible for adding the name cannon fodder to it should executed for treason!

Camera/navigation is awkward, moving the mouse sligtly can make the game camera jump suddenly and far enough to make targeting nearly impossible. the once legendary humour of this series now looks like it should appear on a childrens show for 5 year olds, the music doesn't match the game and even the cinamatic intro is enought to enduce vomiting.. meh

not my favorite

its decent

unique

different. Loved this game on the Amiga 500+ and 1200

and still love it now. \ud83d\udef0a. This game is pretty terrible, which is depressing considering how much I loved the old games. Load times are long, especially considering my computer should have zero problem with this game. The controls feel bad. The camera controls badly as well. Graphics are bad. Skip this game. I'd have more fun playing the older games.. For a game that is 20 years old, the loading screen time between missions is pathetic, it is not like its loading from a cassette tape.

Devs fix this please
